STAG CATALOGUE

2023/24

**FRONT COVER PHOTO:** MFCF-18-036  
is a Pinot son (21% English). With 83 progeny,  
his W12BV is 37.2 (DEERSelect October 2023).

## A POSITIVE FORECAST

There is a positive tone in deer industry this year, albeit cautious given the current economic climate. The change of government should hopefully see the pendulum swing back towards support of farmers and a little more consistency.

After two wetter seasons (on the east coast) which have been challenging in parts and good in others, a drier season reminds us of the need to farm to the environment in order to keep ever increasing costs down.

The past two seasons have reminded us of the importance of integrated farming systems to manage parasites with multiple stock classes along with refugia, genetics and responsible drenching to maintain high performance. The key to optimising all 2 or 3 stock classes is timing to make sure you can hit performance targets to give you the flexibility you need regardless of the farming system or climate.

We are seeing a procurement premium being paid for chilled trade deer this spring that rewards those able to have animals up to weight early and are willing to slaughter them before processing pressure comes on either side of Christmas. This also works in well with de-stocking before what is predicted to be a dry summer. Most of the country seems to be in a good spot as I write this. However we all know how quickly things can change.

We completed the sale of our Southland property in Autumn and have now relocated all the stud animals between our other 2 properties (The Kowhais and Stanton Station) near Fairlie.

After the last 6 years of pouring our heart and soul into the property in Southland it was far more emotional to say goodbye than we thought it would be. The logic was sound but the attachment to the land like most farmers was strong.

The opportunity to have the whole team in one place is not only logistically easier but far more fun. It also means we can stay highly involved with the team and the stud while juggling a young family with no travel and time away to do it.

---

The Fairlie farms incorporate commercial cattle, sheep and deer operations alongside the stud, and we are all enjoying the challenge of knitting the operation together. Our larger deer numbers give us the opportunity to grow our stud numbers further which will give us the opportunity to do additional progeny testing. This is where we kill all progeny to assess meat traits on a deeper scale than the large number we already do for ultrasound eye muscle scanning and Carla testing.

It also means we have the ultimate and highest level of selection pressure from a commercial perspective that gives us greater confidence that not only will your stag leave high performing progeny, but also sound and resilient progeny.

We are excited about the stags bred for sale this year. Genetically we now have a diverse base between English and eastern European animals allowing us to select the best traits from all the breeding to suit different environments and farming systems. This is why we have animals ranging from our red terminal sires (predominantly eastern) through to 90+% English.

We have tested them thoroughly under commercial conditions so although they might not be the biggest stags you find on sale day you can guarantee they are resilient and high performing based on their proven genetic merits.

Our Terminal programme is going from strength to strength with great feedback on the results from the progeny as well as the performance of the sires. They will again be available for private sale outside of the catalogue as 2 and 3 year olds in the \$4-6k range.

We would love to host anyone interested to show you around our operation and share our vision for a profitable, sustainable deer herd.

**Tom, Samantha and the whole Melior team**

Sam, Vic, Dan, Jake, Boyd, Sherryn, Pieter, Reuben, Hamish, Sally, Jack, Cam, Lachie and the rest of our Melior team.

## SIRE SELECTION

### Breeding Values & Indexes in this catalogue

The DEERSelect Breeding Values (BVs) in this catalogue are calculated by AgResearch for the whole industry and thus are an independent scientific evaluation of each stag's genetic merit. The methodology used to calculate the DEERSelect BVs is similar to that used to calculate the SIL BVs for the sheep industry (also performed by AgResearch using the same software as DEERSelect), BREEDPLAN BVs for the beef cattle industry and NZAEL BVs for the dairy industry.

The DEERSelect database currently stores data on:

- W12BV - 12-month weight (yearling weight) breeding value (kg).
- WWTBV - weaning weight breeding value (kg).
- MWTBV - hind weight (kg). This EBV is important to determine the feed requirements of the hind and thus maternal efficiency.
- CDeBV - conception date breeding value (days). A more negative CDeBV means hinds that will calve earlier to match feed availability and more days to grow before the spring premiums occur.
- CWeBV - carcass weight breeding value (kg). An EBV for a combination of growth and dressing percentage.
- EMaCeBV - Eye Muscle Area (size of the muscle/meat on the ribs as measured by ultrasound scanning) (cm<sup>3</sup>).
- CARLABV - Immunity Against Gastro-intestinal Parasites

The following graphs illustrate the genetic trend for Yearling Weight (W12BV), Weaning Weight (WWTBV) and caRLa (CARLABV). These are three key traits for growth and health, respectively, in the DEERSelect analysis.

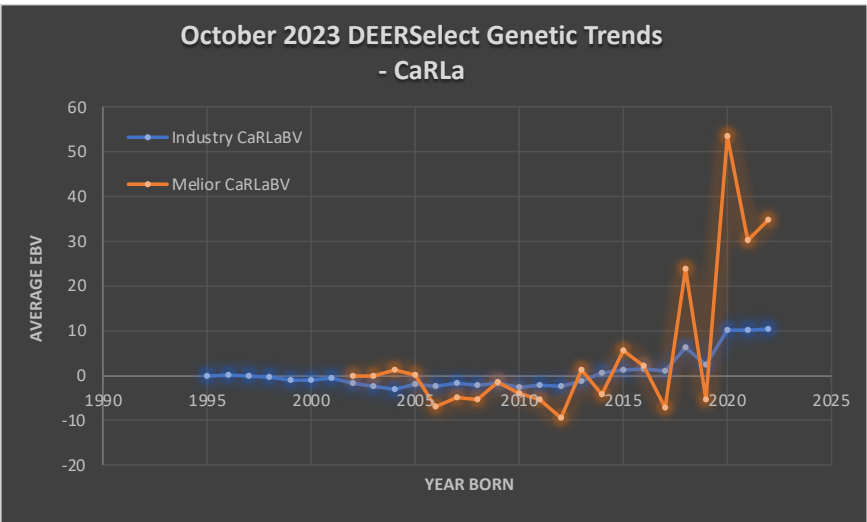

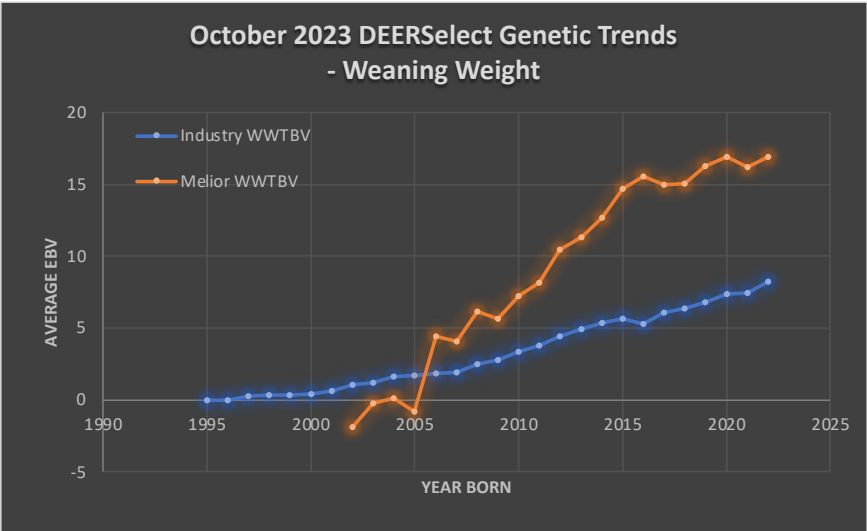

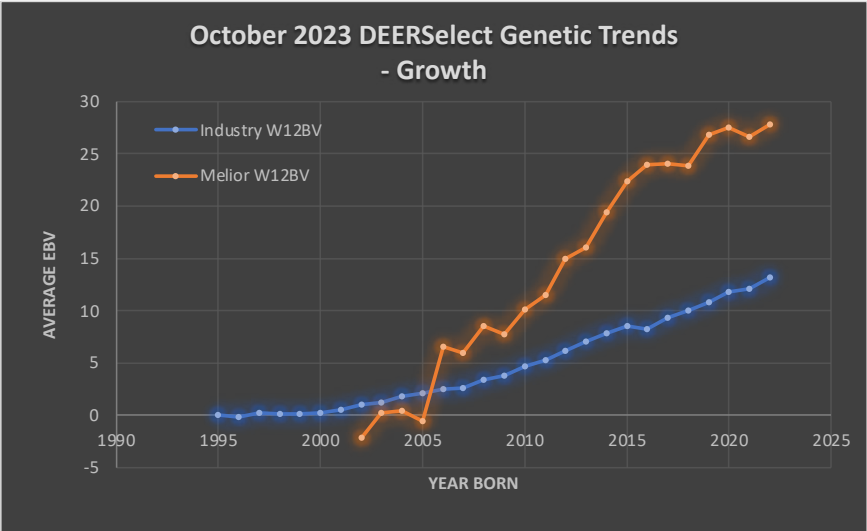

The graphs on the following page show Melior Deer's (8019/8065) progress on these traits versus industry progress.

It is also important to note that while positive genetic trends are desirable for most traits, there are exceptions. For example, it is desirable to have an earlier conception date and consequently, it is desirable to have more negative conception date BVs and trends.

For more information on DEERSelect, please go to [www.deernz.org.nz/deer-hub/breeding/deer-select/](http://www.deernz.org.nz/deer-hub/breeding/deer-select/)

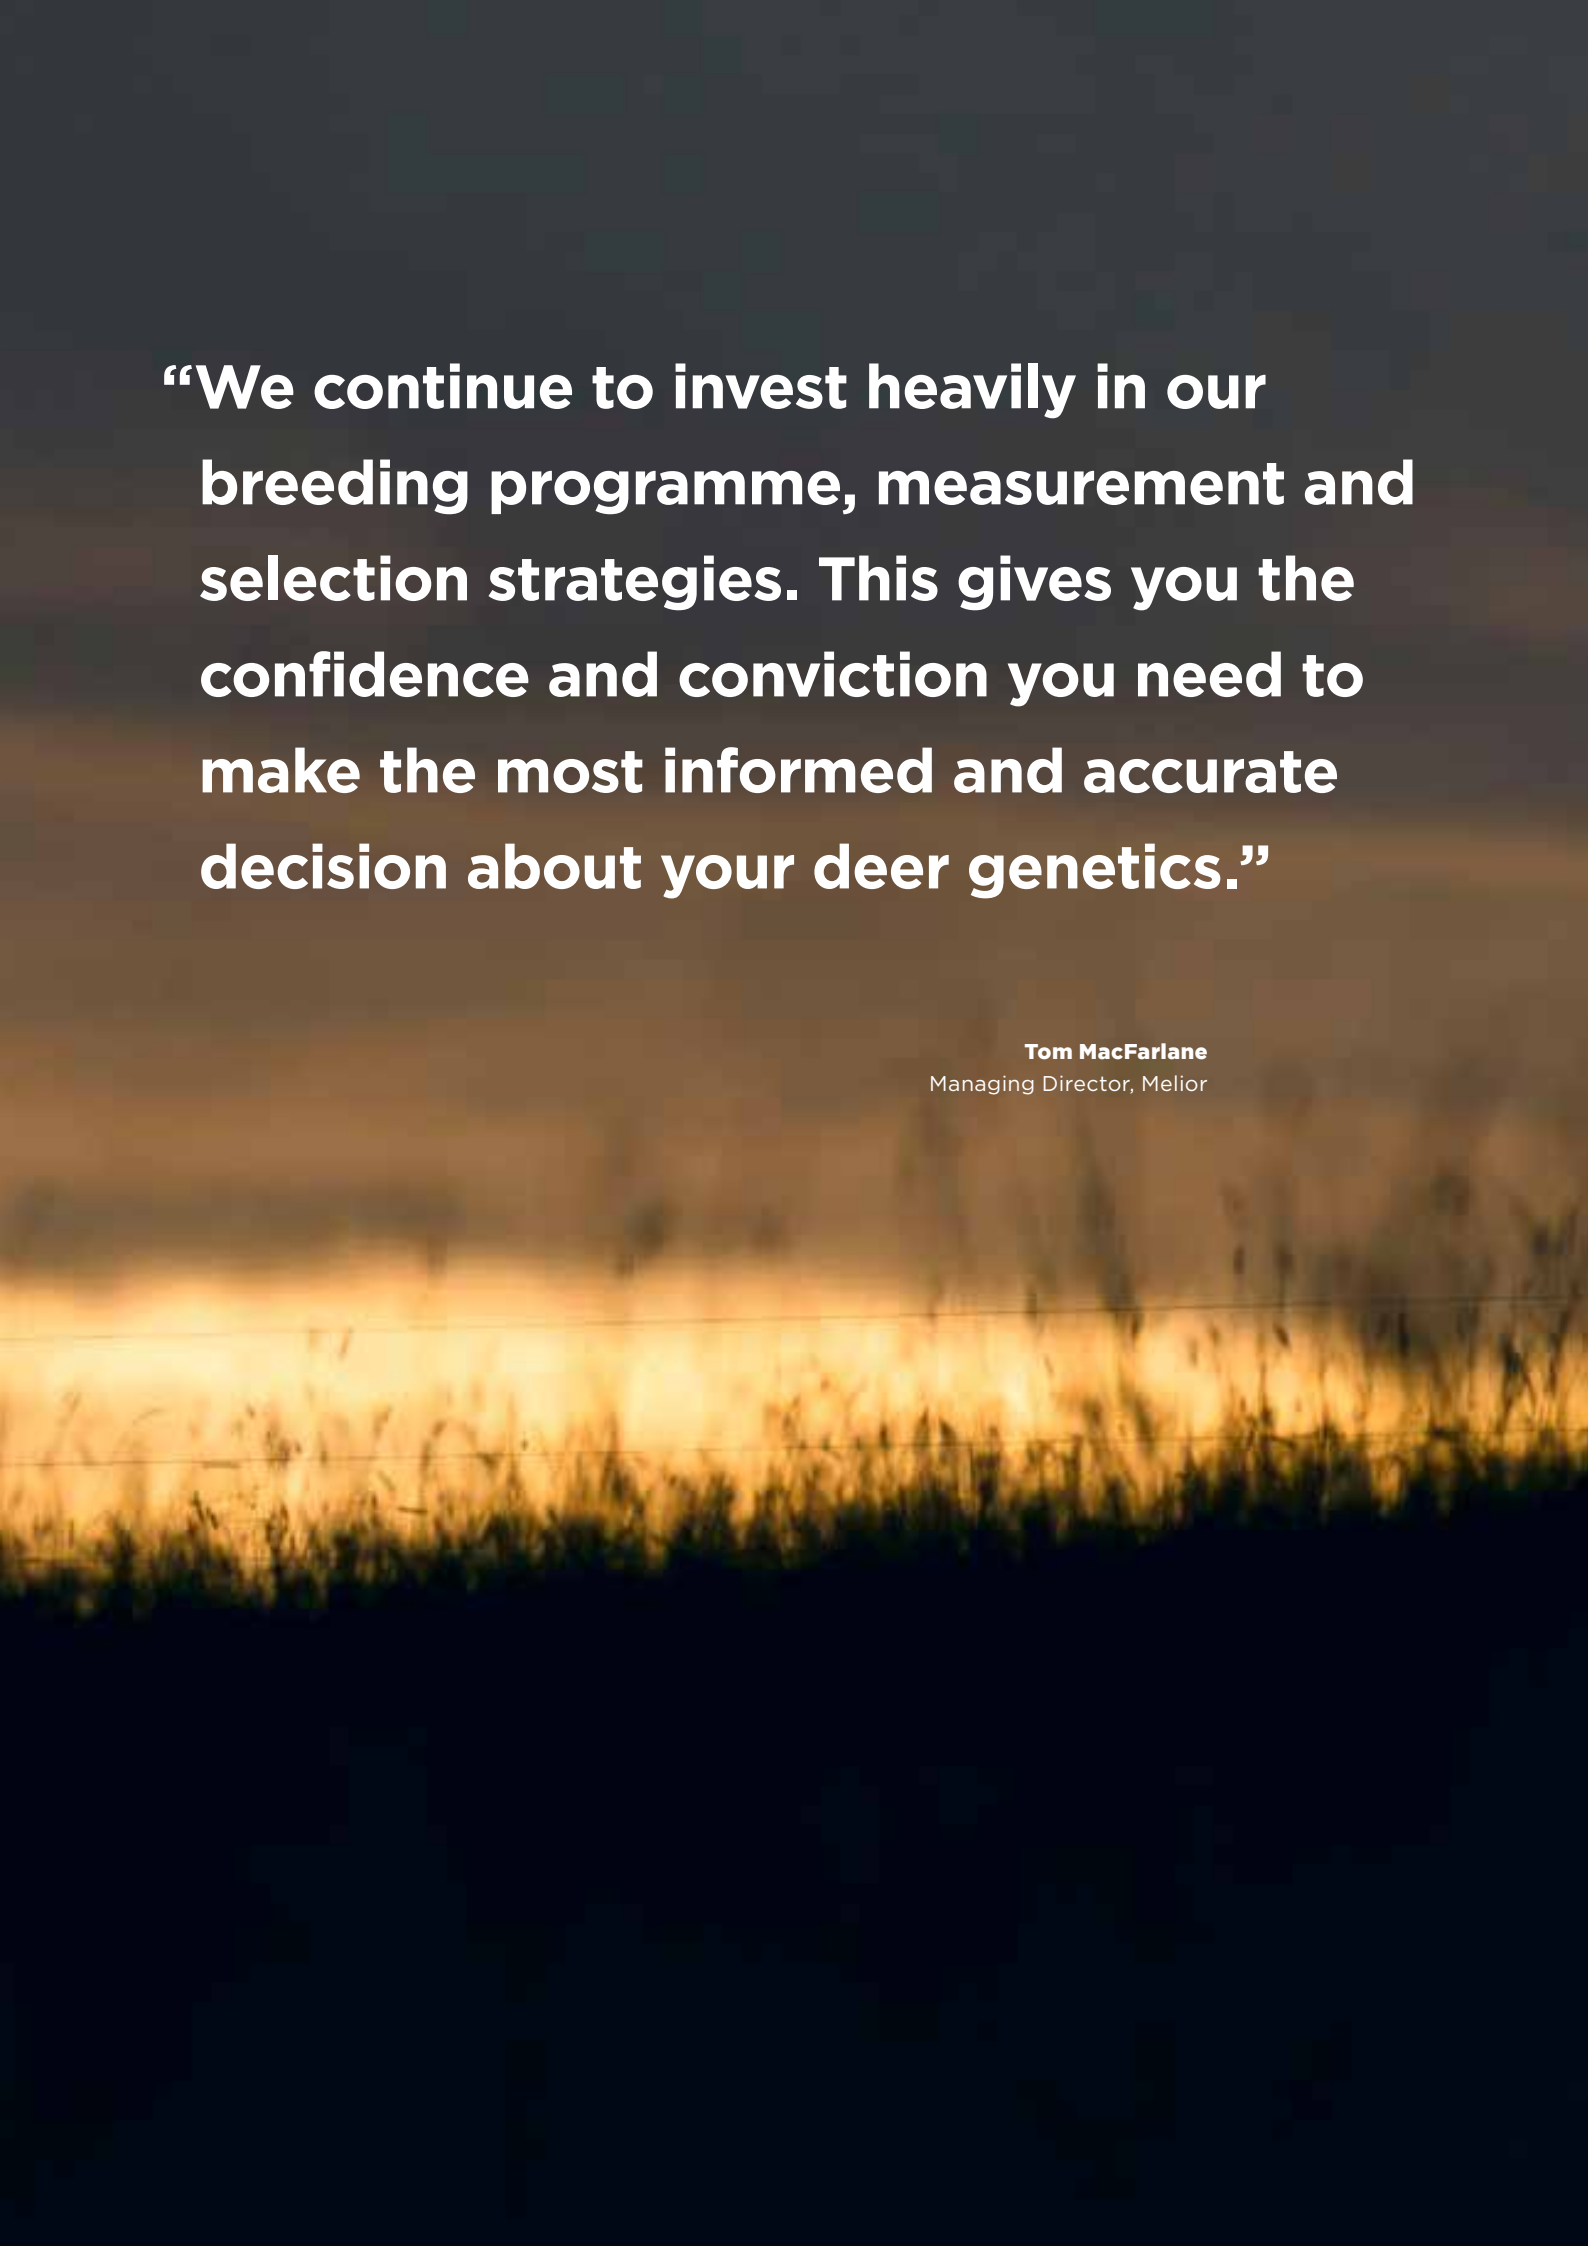

MELIOR / BETTER YOUR BEST

**“We continue to invest heavily in our breeding programme, measurement and selection strategies. This gives you the confidence and conviction you need to make the most informed and accurate decision about your deer genetics.”**

PLEASE NOTE: ADDITIONAL STUD TRANSFER FEES WILL APPLY TO ALL STATED LOT PRICES.

Key to DEERSelect values: **W12BV** - 12-month weight (yearling weight) breeding value (kg). **WWTBV** - weaning weight breeding value (kg). **MWTBV** - hind weight (kg). This EBV is important to determine the feed requirements of the hind and thus maternal efficiency. **CDeBV** - conception date breeding value (days). A more negative CDeBV means hinds that will calve earlier to match feed availability and more days to grow before the spring premiums occur. **CWeBV** - carcass weight breeding value (kg). An EBV for a combination of growth and dressing percentage. **EMAcBV** - Eye Muscle Area (size of the muscle/meat on the ribs as measured by ultrasound scanning)(cm<sup>3</sup>). **CARLABV** - Immunity Against Gastro-intestinal Parasites.

TOP 25% OF OUR SALE STAGS

TOP 26-50% OF OUR SALE STAGS

Key to DEERSelect values: **W12BV** - 12-month weight (yearling weight) breeding value (kg). **WWTBV** - weaning weight breeding value (kg). **MWTBV** - hind weight (kg). This EBV is important to determine the feed requirements of the hind and thus maternal efficiency. **CDeBV** - conception date breeding value (days). A more negative CDeBV means hinds that will calve earlier to match feed availability and more days to grow before the spring premiums occur. **CWeBV** - carcass weight breeding value (kg). An EBV for a combination of growth and dressing percentage. **EMACEBV** - Eye Muscle Area (size of the muscle/meat on the ribs as measured by ultrasound scanning)(cm<sup>3</sup>). **CARLABV** - Immunity Against Gastro-intestinal Parasites.

■ TOP 26-50% OF OUR SALE STAGS

Key to DEERSelect values: **WT12BV** - 12-month weight (yearling weight) breeding value (kg). **WWTBV** - weaning weight breeding value (kg). **MWTBV** - hind weight (kg). This EBV is important to determine the feed requirements of the hind and thus maternal efficiency. **CDeBV** - conception date breeding value (days). A more negative CDeBV means hinds that will calve earlier to match feed availability and more days to grow before the spring premiums occur. **CWeBV** - carcass weight breeding value (kg). An EBV for a combination of growth and dressing percentage. **EMAcEBV** - Eye Muscle Area (size of the muscle/meat on the ribs as measured by ultrasound scanning)(cm<sup>3</sup>). **CARLABV** - Immunity Against Gastro-intestinal Parasites.

## INTRODUCING OUR AMAZING TEAM

PASSIONATE, DEDICATED AND FUTURE-FOCUSED,  
THE TEAM AT MELIOR ARE WHAT MAKES OUR BUSINESS GREAT.

MELIOR / BETTER YOUR BEST

# BE PICKY ABOUT YOUR PROGENY

**We want to make your future deer decisions accurate and informed ones. Let's leave the guesswork to others.**

**We don't do pin the tail on the donkey, blindly choosing our next generation of deer based on what we've got.**

**Our commercially raised Stags have been bred on hill country and we cull hard because we have large herds that give us scale. They aren't soft pampered types with a spectrum of supplements and drenches to look sparkling pre-sale.**

**Instead we use seasons of industry-leading BVs and data sets to support our decisions so you can make yours knowing we've done all the hard work for you. The Across Breed trial work amongst other trials at AgResearch Invermay backs this.**

**If you want a sound Stag with high growth rate progeny that will command higher prices if you're not finishing them yourself, we can help.**

**Whether you're after a fast-growth red sire that competes favourably with other terminal sires, or a maternal sire with the appropriate amount of english breeding to suit almost any farming system and environment, please get in touch.**

**We look forward to being able to host you on our farm in South Canterbury.**

**For more information and details please visit:  
[www.melior.nz](http://www.melior.nz) or call Tom on 027 600 8555 for  
private viewing appointments in South Canterbury.**
